

## AB WIDDICOMBE

### Spring triticales

- Reduced awn, dual-purpose spring triticales for feed & forage use
- Excellent standability
- Resistant to leaf, stem, and yellow rusts, common blunt, moderate resistance to FHB

### Strengths of AB Widdicombe

- High grain yield, 108% of Pronghorn and 106% of Brevis.
- Dry matter yield is 108 % higher than Bunker, similar to Pronghorn.
- Test weight is higher than all triticales checks.
- Kernel size is larger than all checks.
- Lodging resistant, shorter than Pronghorn but taller than Brevis.
- High resistance to ergot, better than all checks.
- Moderate resistance to FHB.

AB Widdicombe was developed by Western Crop Innovations and will be available through FP Genetics.
